

**REMARKS/ARGUMENTS**

This Preliminary Amendment amends the Brief Description of the Invention in the specification to correctly identify Figs. 5(a)-5(d) of the drawings. This Preliminary Amendment amends the abstract to correct typographical errors.

Claims 1-10 are retained from the original application, but Claims 3, 5 and 7-10 have been amended to produce new amended claims that are not multiply dependent in order to reduce official fees. Claim 1 has been amended to correct a typographical error. Claims 11 and 12 have been drafted and filed with our response of January 22, 2003.

Independent claim 1 has been rejected in the final office action of the parent application 09/782,720 under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 5,572,402 hereinafter called Jeong in view of US Patent No. 6,108,199 hereinafter called Bonardi et al.

Referring to claims 1 and 11, the Examiner asserts that main processing functionality for executing programs, DC-DC convertors and external power supply devices with associated cords connectable to an external socket of a computer housing for supplying DC power to a system are inherent in desktop computer systems. Applicants respectfully traverse the Examiner's assertion and submit that the external power supply having a flying lead connectable to an external socket provided in the housing for supplying DC power to the DC-DC convertor as claimed in claims 1 and 11 is not obvious by Jeong in view of Bonardi et al.

The Applicants submit that Jeong does not disclose how power is

supplied to the computer unit. The Applicants assert that Bonardi et al. teaches a conventional mobile computer which is primarily intended for use with an internal keyboard and display. Bonardi et al. does not teach or suggest an appliance for use with external user input and display devices which would include a system unit. Applicants submit that claim 1 has been amended by incorporating the expression displayless and keyboardless to clarify the distinction of claim 1 from Bonardi et al. Bonardi et al. discloses a mobile computer which has a removable data storage device and an external power supply but otherwise bears no relation to the invention according to claims 1 and 11.

Jeong discloses a system unit for a personal computer and that has a removable data storage device. Even the Examiner acknowledged that Jeong does not disclose an external power supply device associated cords connectable to an external socket of the computer housing of supplying DC power to the system. The Examiner further acknowledged that Jeong does not disclose a DC-DC converter. The Applicants submit that Jeong and Bonardi et al. do not teach or suggest all the claim limitations of claims 1 and 11. The Applicants further submit that there is no motivation to combine the teaching of Jeong and Bonardi et al. The Applicants finally submit that there is no expectation of success by combining the teaching of Jeong with Bonardi et al.

Preliminary Amendment
